Summary

Computer Science student at Jordan University of Science and Technology (JUST) with a strong interest in **Full-Stack Development**. Currently enhancing technical skills in **Angular** and **.NET** through practical academic projects. Using modern AI Tools to improve code quality and work more efficiently

Education

Jordan University of Science and Technology (JUST), B.Sc. in Computer Science Expected Jun 2026

- **Relevant Coursework:** Data Structures, Algorithms, Database Systems, Operating Systems, Object-Oriented Programming

Technical Skills

Programming Languages: C#, C++, Python, JavaScript, SQL

Web & Frameworks: Basics of Angular, .NET Foundations, HTML, CSS, REST APIs

AI Tools: Cursor AI, GitHub Copilot, Claude (AI-assisted coding & debugging)

Tools & Concepts: Git, GitHub, MySQL, OOP, Data Structures & Algorithms

Projects

Artisan Freelance Platform (Team Lead) University Project

- **Leadership:** Led a team of 4 students to build a web platform, making sure everyone finished their tasks on time.
- **Frontend:** Created the user interface using Angular, focusing on making it easy for users to browse and order services.
- **Backend:** Built the server-side logic with .NET to handle user login, registration, and different access levels (Admin/User).
- **Database:** Used MySQL to store and manage all platform data like user profiles and service listings.

Achievements

- Successfully led the development of a full-stack university project from database design to frontend deployment.
- Consistently applied clean code principles and modern development tools to achieve project goals.

Languages

Arabic: Native **English:** Very Good
